By GEORGE SOKOLSKY A CREATIVE APPROACH

Dr. Richard C. Rodgers, chairman of the Palma Ceia Methodist Peace Commission, sent me a telegram from Tampa, Florida, starting with

That telegram should have been sent to somebody in the 1920's, when the United States and Great Britain pursued a violently anti-Japanese policy in the Far East and paved the way for Soviet Russia eventually to conquer China. That was one of the really great catastrophes in history. The anti-Japanese boycott in China in 1919, which was a result of the Students Strike and which led to the founding of the Chinese Communist Party, was hailed in the Western world as a great event. But the historical result in 1958 is the Formosan situation which is now faced by

All of mankind disikes war but some peoples are more cowardly than others. In China, where human life is cheap, feudal and civil wars are continuous and banditry is a normal condition. Banditry, in fact, is a usual product of surplus population in villages where the additional males who cannot find agricultural work, have no way of earning a living except by banditry. Thus private armies came into existence. Chiang Kai-shek spent from 1927 to 1948 trying to rid China of these private armies, the existence of which General George Marshall could never understand because these are not normal in Western countries In fact, General Marshall and his advisers understood China too little to be of any value to the

The Chinese Communists have to a degree If you had a world "trouble map" in solved the problem of the private armies by two methods: 1. The swift and efficient method of killing large numbers of persons but not enough to solve the problem of surplus population; By industrialization which can absorb surplus population in mills, factories, mines, etc., but which involves the proletarization of a rural population which takes time. Dr. Jordan Says * Self-Treatment of Tapeworm Can Be Dangerous Business BY EDWIN P. JORDAN, M.D. Written for NEA Service

Two errors in judgment are contained in a letter recently received. The correspondent says nuclear age must be greatly welcomed that a member of her family is complaining of everywhere. But it indicates no surpass- having a tapeworm. She next asks if it is necesing diplomatic mastery, and it offers no sary to have a doctor's prescription in order to

The first mistake is to imagine that a person who "complains" of having a tapeworm has made an accurate diagnosis. In the first place there American working girls are described as may be no worm or parasite present at all. In the second place, there are many different kinds of animal parasites and it is necessary to identify them by means of a microscope or magnifying

glass. This is a technical matter. The second mistake of the writer is to even consider the possibility that good treatment for tapeworm (or any other kind of infection) can be obtained by just purchasing any old drug

There are a large number of animal parasites which can cause trouble in human beings and ere are several varieties of tapeworms

Most (but not all) animal parasites enter the human body in food which has been contaminated and has not been sufficiently cooked to kill the as ever, yet now the light only gilds the parasites or their eggs. Once inside the digestive tract tapeworms attach themselves to the wall of the intestines through a head which has hooks. ing there is a hint of the pale winter sun- The parasite then grows through sections which orm a kind of tail

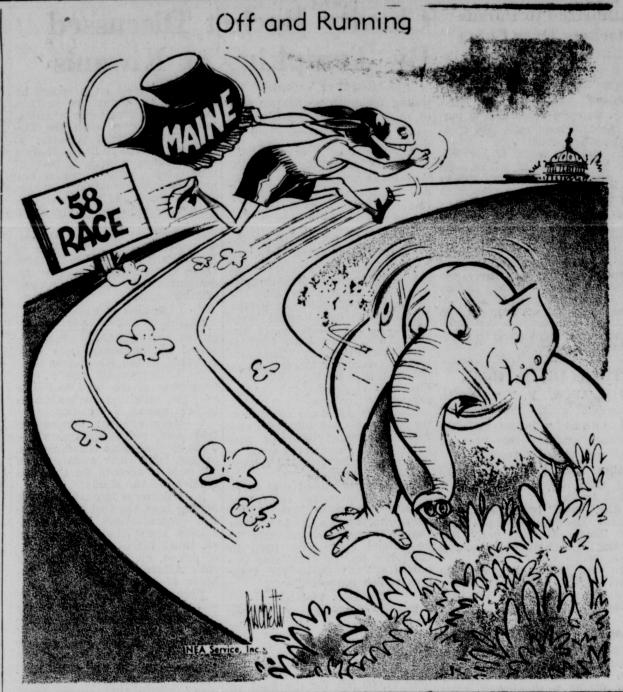

So far as treatment is concerned, just getting rid of some of the sections without separating the head from the wall of the digestive tract is not enough, the worm simply grows more sections. Treatment is by drugs. These drugs are aimed at poisoning the worm without at the same time

upsetting the person. This is actually a hard job, though there are several drugs, including some new ones, which appear to be rather poisonous for animal parasites is a fairly narrow margin, and the person who tries to treat himself is likely either to upset his

One difficulty which is commonly encountered in trying to get rid of tapeworms-and several other kinds of animal parasites-comes from the fact that people may reinfect themselves or get another dose of parasites from some other memare present, sanitary methods of handling and cooking foods and careful washing of the hands

Next Wednesday (Sept. 24) her new weekly half-hour musical series makes its debut on ABC-TV.

Won't Discuss Program She declines to discuss her last season's program on CBS-TV except to say that "everybody tried very hard." It can be said, however, that too many cooks were spoiling the show conducted by that broth of a singer Patti Page; her own ideas of how it should be run were largely ignored.

Now, with a new production staff, she says, "This is my idea of a show. I know that it's quite the fashion this television season to say that you're having a show with a no-format format. But it is true of our new show. You'll see

13th Atlas **Fizzles Out**

CAPE CANAVERAL, Fla. (AP) -The first attempt to launch an Atlas missile the full 6,000-mile intercontinental range ended in a spectacular blowup high in the Florida sky.

The mighty ICBM exploded in a ball of orange flame in the stratosphere Thursday 80 seconds after

It was the 13th Atlas fired to date, and was launched from Pad No. 13 at the Cape.

The blowup cut short immediate U.S. hopes of closing the gap with the Soviet Union in the space weapons race. Most U.S. missile experts believe the Soviets already have an operational ICBM.

The liftoff seemed almost perfect, similar to the three previous shoots that were highly successful over a range of about 3,000 miles. After a roaring climb straight up, the 85-foot war rocket leaned toward a horizontal path and darted toward the southeast. Just as the missile began to spurt out a thick vapor trail at an altitude of about 60,000 feet, it burst apart with a brilliant flash. Shattered pieces shot out in all directions from a huge puff of smoke that hung in the sky, and rained down on the Atlantic. The cause was not announced at

The most important article I've read in many a day is one by Hon. T. Coleman Andrews, who served as U. S. Commissioner of Internal Revenue during the first years of the Eisenhower Administration.

If there is any one who knows what excessive bureaucratic spending, rising income taxes, Government debt and inflation are doing to us, this is the man. His article should be distributed by the

RADIO AT A DINNER PARTY Dear Mrs. Post: My husband and I are arguing about whether or not it is permissable to turn the radio on during a dinner party. My husband loves music and often turns on the radio when we have dinner guests. He thinks it is entirely proper do this and that music adds to the dinner party. I think it's unfair to run the risk of forcing people to listen to something they may not want to hear at all and, furthermore, it hinders conversation. What is your opinion?

Answer: I agree with you. Good food and the conversation of those at your table should be all that is necessary to make your dinners completely enjoyable, and there is plenty of time for music later.

Accepting for One Alone Dear Mrs. Post: May a wife accept for herself alone an invitation to the wedding reception of a friend when the husband finds it impossible to go? If so, should the reply be sent in her name only?

Answer: It is entirely proper for a wife (or husband) to take it for granted that either one alone will be welcome at a general wedding reception. The acceptance would be worded as

Rush Reduces Magic Number To 2, Wins 10th

By ED WILKS Associated Press Sports Writer

After 11 years in the majors, Bob Rush finally is going to get a chance to pitch in a World Series. And it looks like the big right-hander has ideas of being the Milwaukee Braves' No. 3 starter against the New York Yankees.

Rush, 32, who spent his first 10 seasons with the Chicago Cubs did the pitching Thursday night as the Braves whipped St. Louis 9-3 and reduced their magic number to two in the only National League game scheduled.

Good Control

He wasn't particularly neat about it, giving up 11 hits, but he didn't walk a man while winning his third in a row. It was only his fifth complete game of the season, but his second in his last three starts. His record is 10-6.

With young Joey Jay unable to do more than sideline work because of a finger injury, Rush is grouped with Bob Buhl, Juan Pizarro and rookie Carl Willey in the competition for manager Fred Haney's favor as a third series starter behind Warren Spahn and Lew Burdette.

Buhl, out most of the season with injury, has worked only once since returning to action Labor Day. Pizarro, a lefty, Willey and Jay took up the slack when Buhl was out. Willey puts in his bid for a series start when he goes against Cincinnati tonight.

Could Clinch The Braves, who could clinch

tonight with a victory should sec-ond place Pittsburgh lose to Philadelphia, beat the Cards with four runs in the fourth against Sam Jones (13-12). Red Schoendienst, who was 4-for-5, started it with one of his three doubles. Hank Aaron brought him home with a single. Wes Covington singled and Frank Torre then brought the Braves from behind Revenge in with a two-run, two-out triple. Johnny Logan singled home the

DON'T CHANGE TIRES ON THE ROAD

Changing tires on the roadside is always dangerous. This dangerous procedure can be eliminated by servicing tubeless tires with AIR GUARD, the "weightless" sealant.

MAKE YOUR TIRES

Add the safety of puncture-sealing to the tubeless tires now on your car. New puncture-sealant prevents sudden air loss even after puncturing object is ejected from the tread of your tire.

The most recent technological advance from United States Rubber's Research Laboratories is a "weightless sealant" called AIR GUARD. This sealant, when placed in tubeless tires, ends the danger of roadside tire changing due to tread punctures.

AIR GUARD makes any tubeless tire equal in mobile puncture safety to the highest priced puncture-sealing tires available today. All tubeless tires have puncture-sealing characteristics as long as the puncturing object remains in the tread.

Field tests proved, however, that tubeless tires serviced with AIR GUARD maintain safe, drivable air pressure for 48 hours after puncturing object has been thrown out.

At highway speeds, tires have a tendency to throw out the puncturing object, leaving a hole in the tread. Once the puncturing object is ejected, air loss is sudden and danger-ous. With AIR GUARD in your tires you do not experience sudden air loss because AIR GUARD rushes in and plugs the hole left by the ejected puncturing object.

Safe, drivable air pressure is maintained for 48 hours. Thereafter, you simply bring air pressure back to normal. You can keep this up for hundreds of miles until permanent repair can be conveniently made.

All punctured tires eventually require permanent repairs, even the most expensive puncture-sealing types. AIR GUARD permits repairing in the regular manner; and, unlike other sealants, has no adverse effect upon the tire's performance. AIR GUARD does not affect the handling characteristics or riding qualities of your car ... will never cause out-ofbalance condition.

AIR GUARD is an exclusive product of U.S. Rubber Company. This puncture-sealing service is rendered in less than an hour for all five tires. Come in today and add the safety of AIR GUARD to the tubeless tires now on your car.
